

Zimbra mail - Mobile Configuration -IMAP

Email App Configuration for Mobile Device

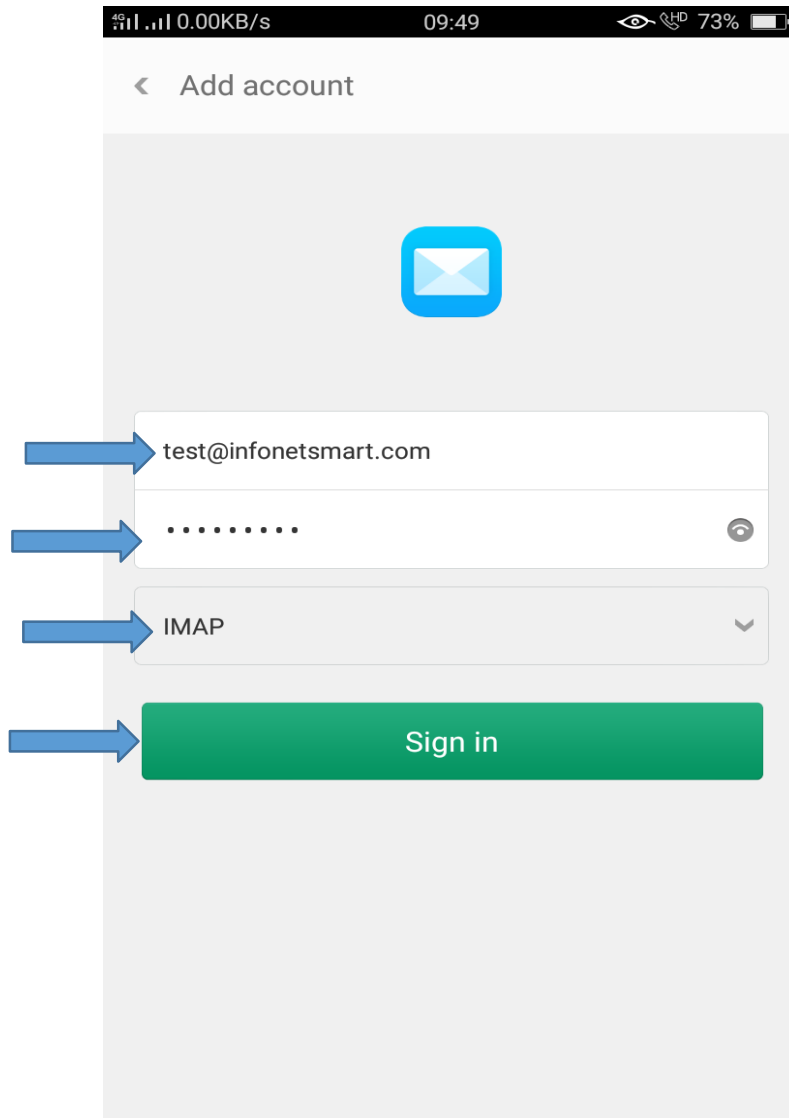

There is two settings available

1. IMAP
2. POP3

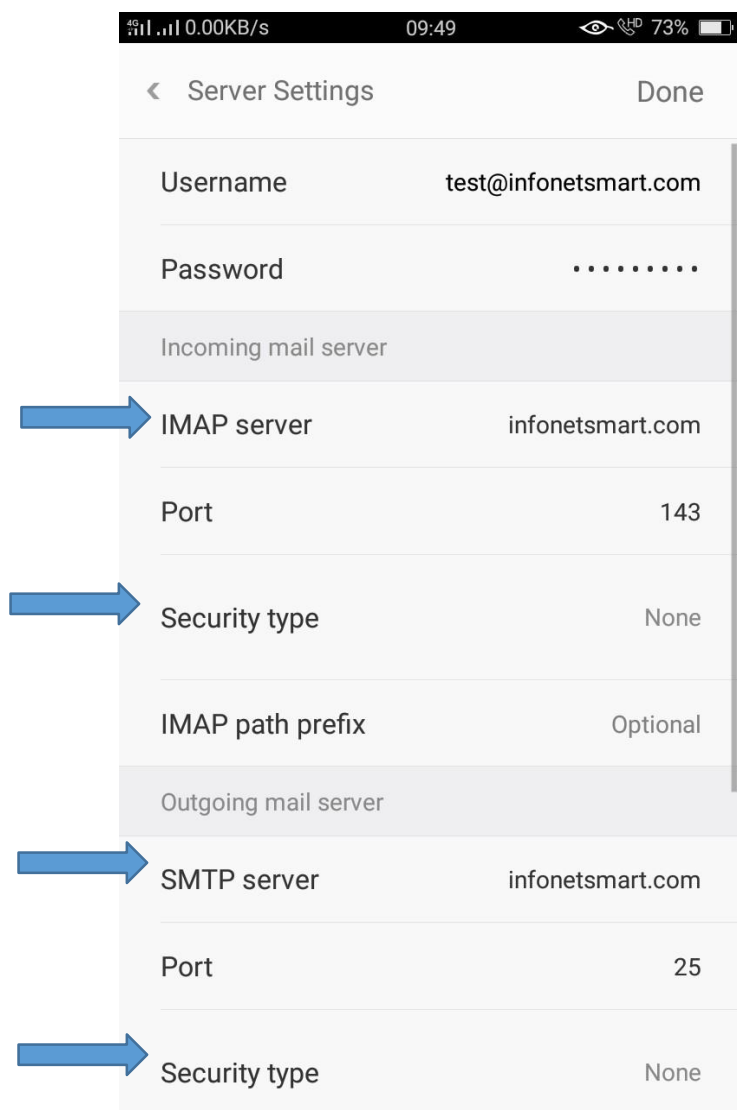

Step 1: Open your Email Application on your mobile device. It shows like below

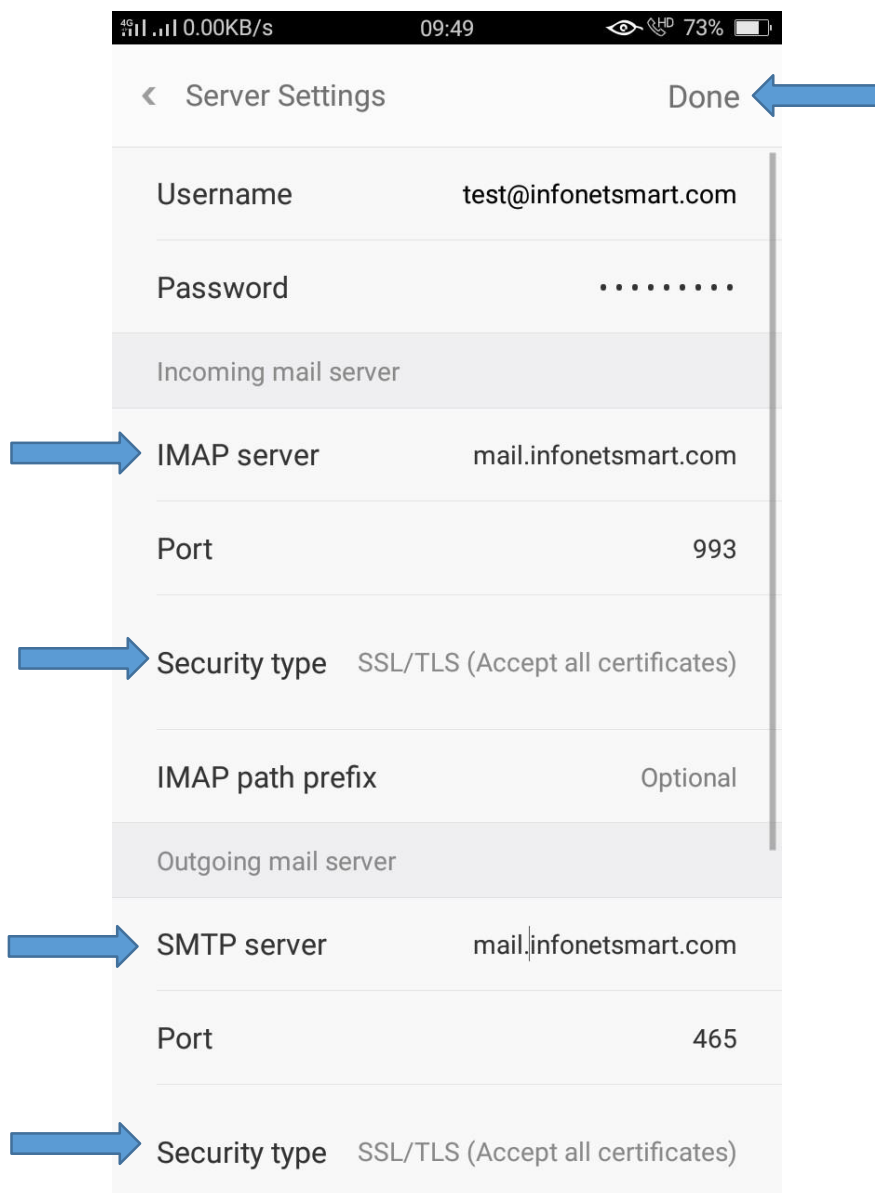

Step 2: Select **IMAP** and enter your username and password. Then click **Sign In** menu. It looks like below

Step 3: After sign in menu following menu appears we need to change IMAP Server, Security type, SMTP Server settings

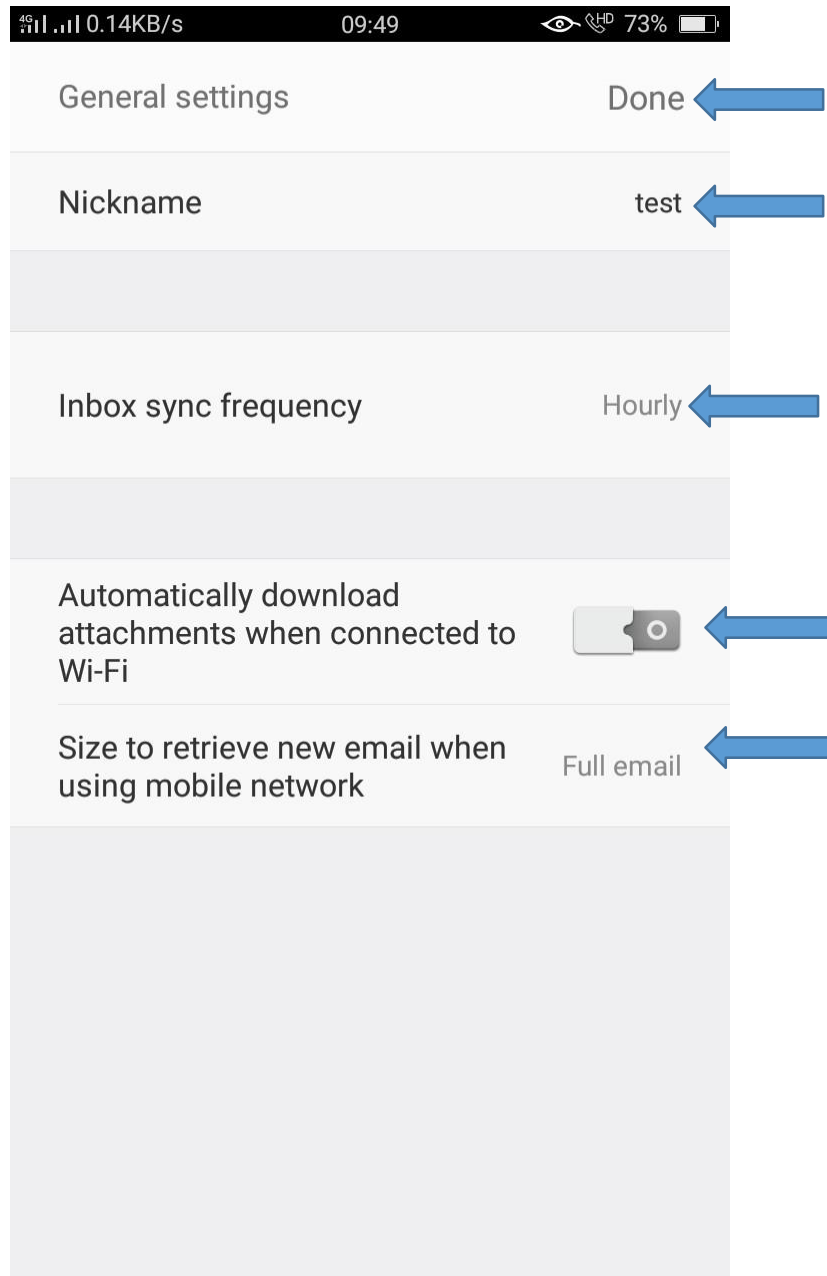

Step 4: Above changed settings looks like below

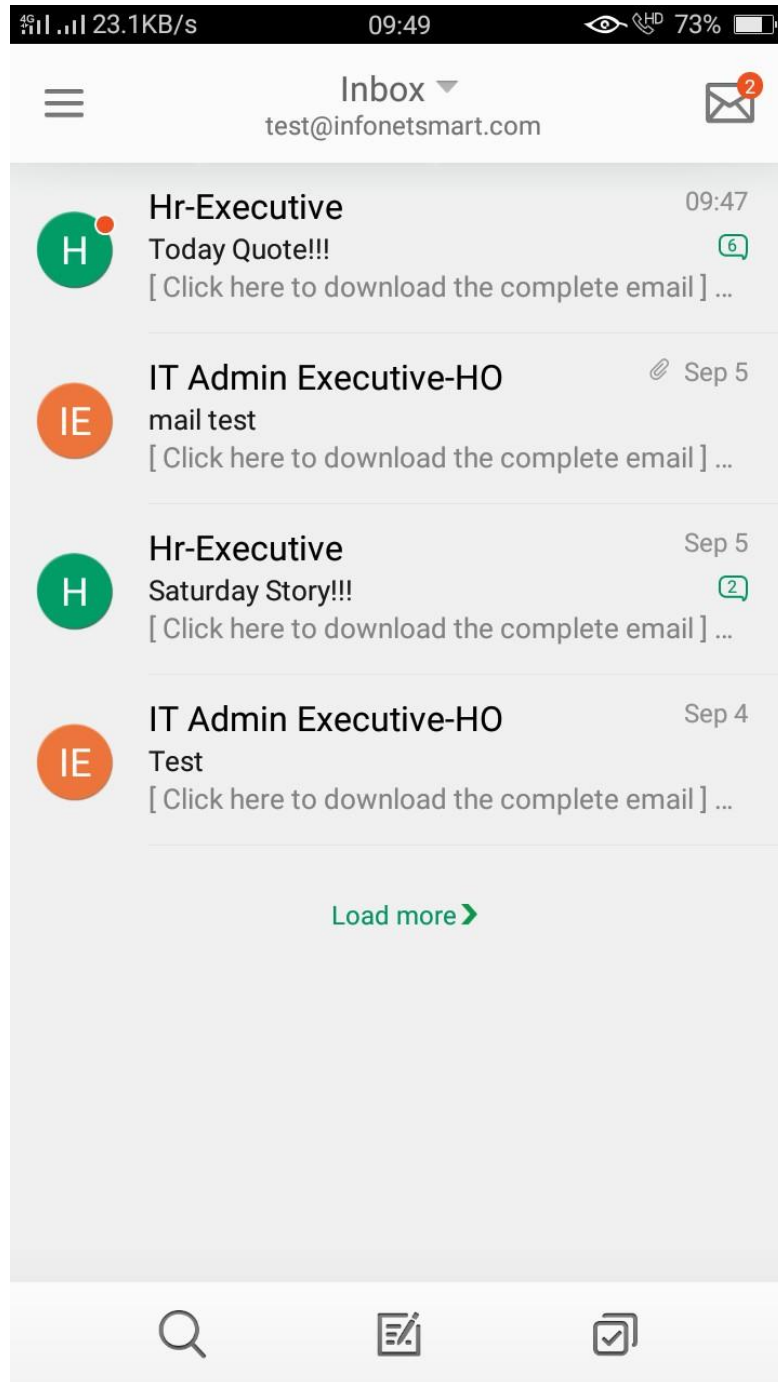

Step 5: Click **Done** on top right corner

Step 6: Below window you can set nickname, sync interval, mail downloaded via Wi-Fi or phone internet

Step 7: Now you can use your mail in mobile Email Application. That screenshot shows like below
